Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Moisture and instability will continue to generate showers and thunderstorms across the interior today and tonight. There will be a slight chance of thunderstorms each afternoon and evening Wednesday through Friday. A return to more seasonable conditions is expected for the second half of the week. Meanwhile, the coast should anticipate overnight low clouds and fog with temperatures remaining near normal.

San Francisco Weather:

Today there will be showers and possibly thunderstorms over the northern half of the forecast area. Precipitation ends by this afternoon and seasonable temperatures return midweek and continue into the weekend.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Scattered showers and isolated thunderstorms today mainly from about I-80 northward, then less shower activity expected by Wednesday. Locally heavy rain is possible at times in the northern Sierra Nevada. Today the region will have mild temperatures again with plenty of clouds and showers, then warming temperatures starting on Wednesday.

Hanford Weather:

Low pressure over northern California will push slowly inland later this week keeping an onshore flow over the area. Temperatures will be fairly close to seasonal normals for the remainder of the week and there will be a slight chance of thunderstorms near the Sierra Crest each afternoon.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Skies will be mostly clear except for coastal night through morning low clouds and fog through the end of the week. Temperatures will be near or slightly below normal through the end of the week. High pressure will bring above normal temperatures to the area by early next week.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

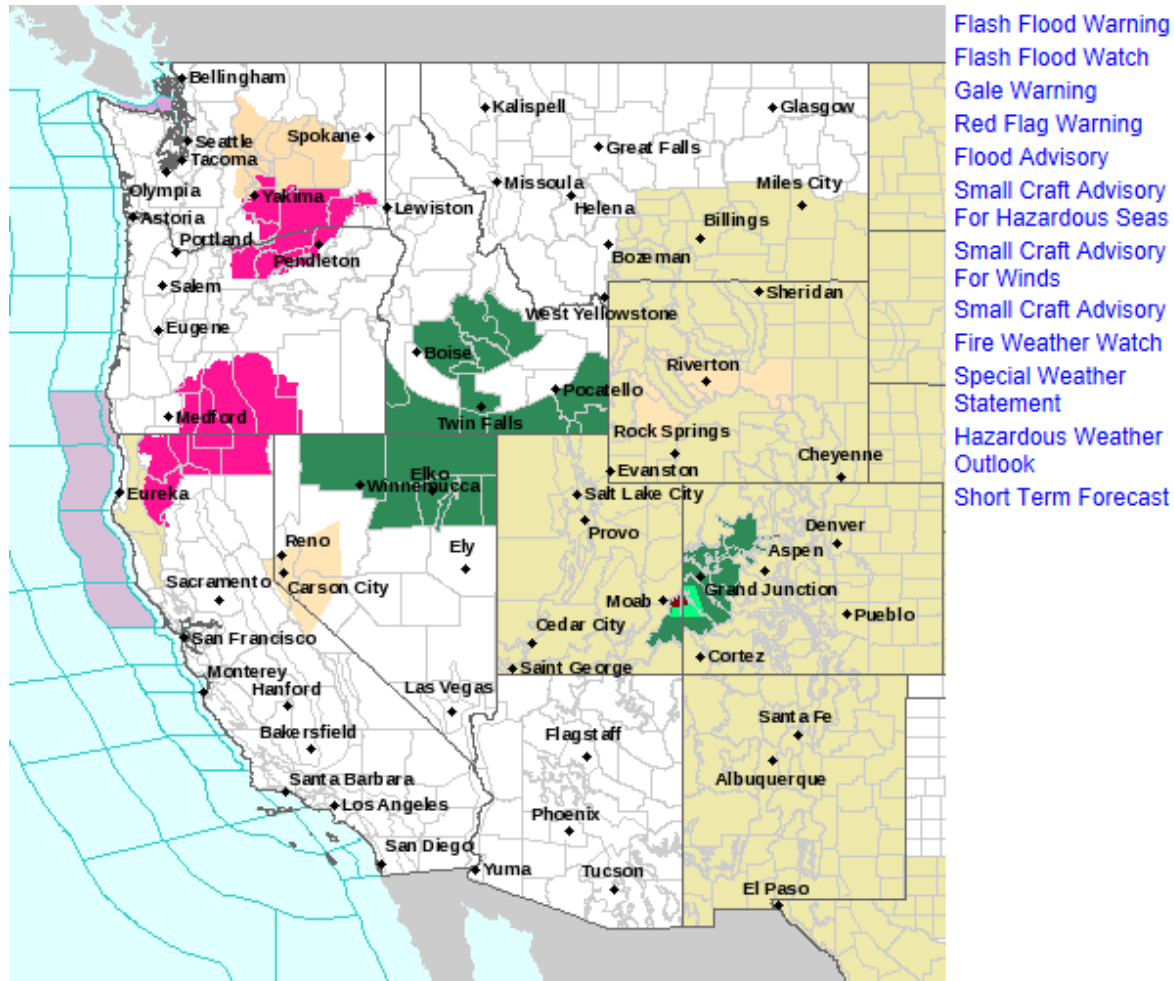

A weak low pressure system near California will bring dry weather through Thursday with a slightly deeper marine layer and slightly below average temperatures. For Friday into early next week, high pressure to the east will strengthen and expand westward. This will bring a warming trend and a shallower marine layer with high temperatures warming to near average for the weekend into next week. Monsoonal moisture may return for Monday and Tuesday.

Southeast California Weather:

Significantly drier air will continue to overspread the region today, likely lasting through Tuesday. High temperatures are expected to top out near seasonal normals the entire week. A return of monsoon moisture and increasing storm chances are expected by Friday or Saturday.

FIRE ACTIVITY

Oregon Gulch, Vegetation Fire, Siskiyou County Cont. (Update)

Critical Infrastructure (including Hospital and Medical Facilities)

- The fire is threatening Fall Creek which is the source of the City of Yreka's water supply. Cal Fire has this as a significant infrastructure item for their planning purposes.
- City of Yreka has a contingency plan in place. There is a generator on site, with a second one available if needed. The City can also pump from wells if necessary.
- Cal Fire has prepped the area around the water intake station to assist with defense.

Utilities

- The fire is threatening 60 kV, 115 kV, and 230 kV power lines.
- According to CUEA representative, there is a PG&E substation that is threatened. Currently firefighters have a line around the substation which they feel will minimize the threat. PG&E technicians have checked the natural gas lines and they are deemed safe. As a contingency they have a low-boy generator that is located in Shasta County.
- PG&E Emergency Management is actively monitoring the situation throughout all of Northern California.
- Klamath River Hydro Project: Cal ISO tested the system and confirmed it had not lost capacity, and is stable. The lines are currently parallel to the fire, unaffected and operating normally. PG&E grid contingency plan is an alternate routing capability as is Cal ISO's contingency plan. If the system were to go off-line, there would be no impact to the grid. It is a small satellite generating station of 2.75 megawatts, which is tied to an auxiliary 60 KV system used as backup generation only to lower costs. It is a low-voltage, private plant under contract with PG&E.

- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 3rd: Don Pedro 44%; Exchequer 20%; Folsom Lake 41%; Lake Oroville 35%; Millerton Lake 52%; New Melones 26%; Pine Flat 13%; San Luis 22%; Lake Shasta 34%; Trinity Lake 35%; Pyramid Lake 93%; and Castaic Lake 47%.

- Emergency Food Aid, Rental and Utility Assistance: The California Department of Social Services has provided to date over 172,000 boxes of food to community food banks in drought-impacted counties. Approximately 117,500 boxes of food have been picked up by 61,906 households. By August 8, an additional 15,100 will be delivered to six counties. Local food banks continue to target this food aid to residents most impacted by the drought.

- The non-profit group La Cooperativa continues to distribute the \$10 million state-funded emergency rental assistance to impacted families and individuals across counties most impacted by the drought. As of July 30, the Department of Housing and Community Development (HCD) has reported that a total of \$1,716,748 is committed; and \$1,060,932 in funds has been issued to 923 applicants in 18 counties.

Situational Summary

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective on Tuesday, July 29, following final approval by the Office of Administrative Law (OAL). The regulations will be in effect until April 25, 2015, unless they are extended or repealed. More information is available on the State Board's Conservation Regulation Portal and in a new Frequently Asked Questions document.

http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml

- W21: Water in the 21st Century Legislation Introduced: California Sens. Barbara Boxer and Dianne Feinstein along with their House colleagues Reps. Grace Napolitano (D-CA-32) and Peter DeFazio (D-OR) introduced legislation to promote water conservation and recycling on Thursday, July 31. The identical House and Senate bills, entitled "W21: Water in the 21st Century," expand rebates and grants for water conservation and efficiency; support local investments in water recycling and improved groundwater management and storage; invest in research into water-saving technologies and desalination; and establish an open water data system.
